Project Management

Plan Strategically, Execute Precisely, Deliver Excellence

Duration	Level	Course Fee	Delivery
8 Weeks (Full-Time) / 16 Weeks (Part-Time)	Beginner to Intermediate	Contact Us for Fee	In-Person Abuja & Kaduna

Course Overview

The Project Management programme trains students to plan, execute, monitor, and close projects successfully using both traditional and agile methodologies. Covering PMBOK fundamentals, Agile/Scrum, risk management, stakeholder communication, and digital PM tools, the course prepares students for careers as project coordinators, project managers, and Scrum Masters across sectors including IT, construction, NGOs, banking, and government. Students complete the course with a portfolio project and foundational knowledge for PMI-CAPM and Scrum certifications.

Course Curriculum

Week	Topic	What You Will Learn
Wk 1	Introduction to Project Management	Project lifecycle, PMBOK knowledge areas, project vs operations, PM roles, constraints triangle
Wk 2	Project Initiation	Business case, project charter, stakeholder identification, RACI matrix, feasibility analysis
Wk 3	Project Planning	WBS, Gantt charts, network diagrams, critical path method (CPM), resource planning, budgeting
Wk 4	Risk & Quality Management	Risk register, risk response strategies, qualitative/quantitative risk analysis, quality plans
Wk 5	Agile & Scrum	Agile manifesto, Scrum framework, sprints, ceremonies, backlog management, user stories, velocity
Wk 6	Project Execution & Monitoring	Earned value management (EVM), change control, issue logs, status reporting, team leadership
Wk 7	Stakeholder & Communication Management	Communication plans, stakeholder engagement matrix, presentation skills, meeting facilitation
Wk 8	Project Closure & Capstone	Lessons learned, project handover, closure report, capstone project presentation, PM career paths
